~~SECRET~~/CONTROL - U.S. OFFICIALS

RETURN TO CIA LIBRARY

- A Runway
- B Taxiway
- C Concrete apron
- D Destroyed factory building
- E Cantonment building
- F Wooden garages
- G Quarters building occupied by air force
- I Counted fighters
- II Four fighters with yellow hubs
- III Estimated fighters

The diagram illustrates two types of force systems. On the left, a parallel force system is shown with two vertical rectangular blocks, each with a horizontal force vector F pointing to the right. A bracket below the blocks is labeled G . On the right, a couple system is shown with two vertical rectangular blocks. The left block has a horizontal force vector F pointing to the right, and the right block has a horizontal force vector F pointing to the left. A bracket below the blocks is labeled G .
